Reactome Analysis Online

We need to make a file of our significant genes that we caupload to the reactome website:

```
sig_genes <- res[res$padj <= 0.05 & !is.na(res$padj), "name"]
print(paste("Total number of significant genes:", length(sig_genes)))</pre>
```

[1] "Total number of significant genes: 8147"

write.table(sig_genes, file="significant_genes.txt", row.names=FALSE, col.names=FALSE, quote
